Weatherization provides cost-effective improvements (based on a computerized energy audit) to increase the energy efficiency, safety, and comfort of the building. Improvements may include insulation and air sealing, heating system repair and replacement, and refrigerator replacement.

The Weatherization Assistance Program is funded by the United States Department of Energy and the State of Wisconsin Division of Energy, Housing and Community Resources. In some **rare** instances an owner contribution may be required for weatherization work. The local weatherization agency listed below will produce an estimated owner contribution (**if required**) prior to a work agreement.

Community Action Inc. is a non-profit organization that contracts with the State of Wisconsin to provide weatherization services in Rock County. Community Action Inc. weatherizes approximately 200 units each year.

To apply for weatherization services, complete the authorization and provide a rent roll or list of tenants with contact information**.** The weatherization agency will follow up with you and the tenants to determine if the building is eligible.
